Professional Summary:

- I am a highly motivated web developer with 5+ months of experience in creating and maintaining websites and web applications.
- I am always eager to learn new things. I am also a team player and am always willing to go the extra mile to help my team succeed.
- From inception to deployment, I provide a comprehensive development process. This encompasses every stage, from concept and design to coding and testing, ensuring a seamless and high-quality end product.
- MERN stack development is my expertise in crafting dynamic, full-stack web applications. MongoDB serves as the database, Express.js powers the server, react drives the front-end, and Node.js manages server-side operations. This modern and versatile technology stack allows me to create highly responsive, scalable, and feature-rich web applications that meet your specific needs.

Work History:

Web Developer Intern, 11/2023 to current

Megaminds IT Services – Remote

- Developed user interfaces with modern JavaScript frameworks such as React, HTML5, and CSS3.
- Wrote custom HTML and JavaScript for existing websites.
- Collaborated with project managers and development team to brainstorm new ideas.
- Integrated third-party APIs into existing web applications for enhanced functionality and user engagement opportunities.
- Develop full stack websites (React JS) with backend (Node JS, Express JS) based on client requirements. Creating mern stack web application based on client requirements.
- Architected and developed a web-based application that achieved 80% uptime over a 6-month period.
- Developed a modular, single-page web application in React that incorporated responsive design principles.

Web Developer, 01/2023 to 04/2023

Built-in Tech – Hyderabad

- Enhanced user experience by implementing responsive web design and optimizing website performance.
- Developed custom web applications, resulting in tailored solutions for client needs.
- Planned website development, converting mock-ups into usable web presence with HTML, JavaScript coding.
- working on creating and maintaining websites and web applications for clients.
- Creating website using python flask, HTML, CSS, JS.

Projects:

- **MyProject_Showcase** : Nov 2023 - Nov 2023
  This is my website for showcasing my projects, where you can view the best of what I've built while studying and working. For an engaging animation, I used framer motion and react js. For additional information on my project, see this website, which is also hosted on the server.

- **Company Website:** Nov 2023 – Jan 2024
  Explore comprehensive information about our company's history, mission, and values, gaining insight into what drives us forward. Discover our range of products/services and how they cater to the needs of our diverse clientele. Whether you're a potential client, investor, or

simply curious about who we are, our website provides all the necessary details to understand our business model and achievements.

- **Crypto Live Dashboard**: Oct 2023 - Oct 2023
  it is a Live auto updating Dashboard. This dashboard visualizes Crypto Market Data. Data used is dynamic, coming directly from crypto API. Creating a crypto live dashboard using React with live data fetching from an API and interactive features like a dropdown to select different currencies is a great project. To implement this, i've used ApexCharts for rendering dynamic and interactive charts.

- **CarHub - Car Rental WebApp**: Feb 2023 - Mar 2023
  This is a website for renting cars, and its named Rose CarHub. where you can find additional features such as a functioning search bar, data pulled from an api, an eco-friendly design, and working car details. When you click the see more button to move to the next page to view more information on cars, the url is also immediately changed.
